

## **Carol Bibb**

Caroline (Carol) Rice Bibb, Senior Vice President & General Manager of the Catalyst, Adsorbents & Specialties business for UOP, a leading international supplier of process technology, catalysts, engineered systems, and technical and engineering services to the petroleum refining, petrochemical, chemical, and gas processing industries. Prior to this appointment, she was president of Honeywell Federal Manufacturing & Technologies LLC in Kansas City, MO.

A 25-year veteran of Honeywell, Bibb has held numerous positions in engineering, health, safety and environment, marketing, business development and general management.

Ms. Bibb began her Honeywell career as a chemical engineer at the Honeywell facility in Metropolis, Illinois, where she was a process engineer.

She also served as the North American business director for SC Johnson Polymers in Racine, WI, a North American-based business for styrene-acrylics used in inks, coatings and adhesives.

Ms. Bibb has a bachelor's degree in chemical engineering from Tennessee Technological University and an MBA from William & Mary. She has completed Honeywell's Executive Black Belt program and Executive Development Program.
